

Non-Pressure Anti-Pinch Device for Power windows of Vehicle

Not afraid
anymore!

Safe

Smart

An unique complete anti-pinch power windows solution which provide a comprehensive protection for passengers, children and pets. The dual protection, the intelligent sensing technology and force constantly technique avoid any errors caused by manual operation.

This product can be used with old or new cars, before and after market. Welcomed to cooperation, development and integration.

Certificate: ISO-16750-2

Features

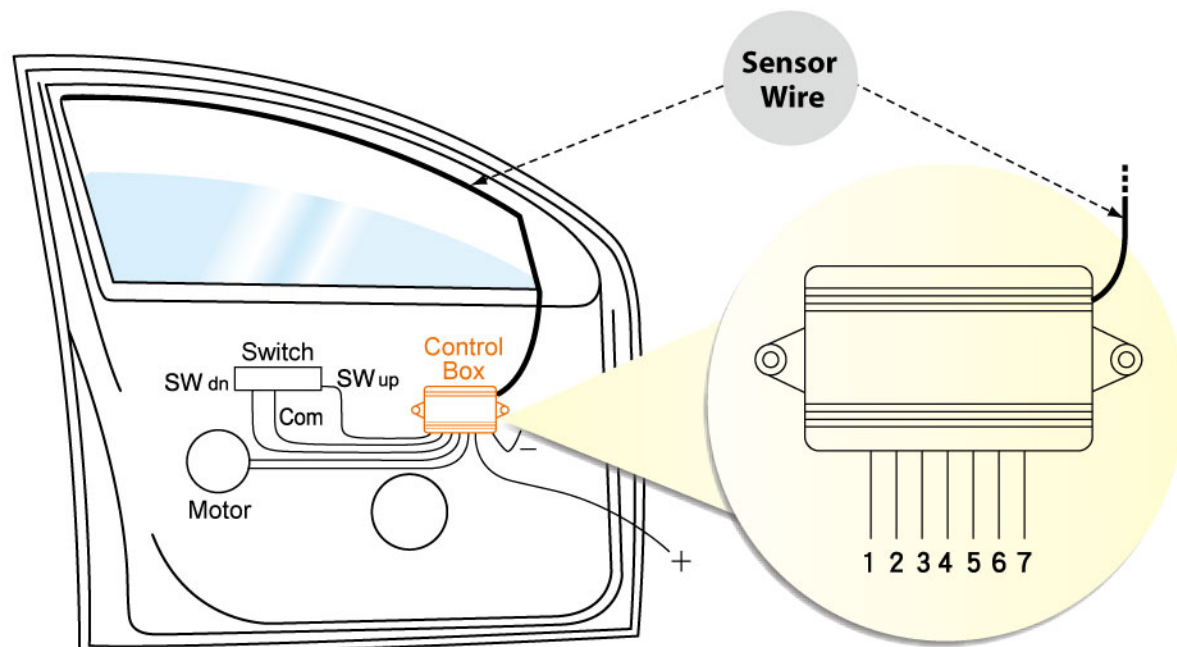

■ In-System dual protection, better safety property than others.

1. Layer 1, Pressure free anti-pinch system. When an organic (human body, fruit, vegetable...) has been detected, the power window reversed 0.5~1 second when it goes up. Protect all of the passenger out of injury under any condition and error operate of power window.
2. Layer 2, Adjustable pressure sensing anti-pinch system. When an inorganic (purse, wood ..) has been detected. The power window sense the pressure and stop it. For example; when the level set to 5kp (49 Newton), the window will stop at current location when an inorganic been detected and sensed the clamp force exceed 5kp.
3. Dual protection work all the time to provide the comprehensive protection.

■ Alert function included.

■ Suitable for AM, also welcome integrate into OEM design.

How to connect

Control Box:

Including power module, signal processor, output control module...etc.

1. SW up
2. SW dn
3. -MT-
4. +MT+
5. Power+
6. Power-(Ground)
7. COM
